

FIXED FLAIL MULCHER

The EZ-FF Range of Fixed Flail Forestry Mulcher are the latest addition to the EZ Machinery line of Mulchers. Engineered to work efficiently across a range of excavators from 8 to 30 Tonnes. It is the perfect tool for property maintenance, land clearing, heavy vegetation management, or to create a defensible space in areas where bushfires are a threat.

Like all EZ Machinery Mulcher attachments, the robust design is efficient, durable, and low maintenance. Cutting capacity up to 200 mm continuous. With the addition of the FF Range, to the Mulcher line up, EZ Machinery is continuing to innovate the Australian Forestry and Vegetation Management attachment market

FIXED FLAIL MULCHER

A hydraulic motor is matched to the hydraulic output of your Machine for superior power delivery. The direct drive coupling eliminates high maintenance belts and pulleys. This ensures you get the maximum performance from your mulcher using your standard hydraulic system. The Machines are fitted with two main high pressure hoses for hydraulic inlet and outlet, and in most cases, don't require a case drain.

Each machine comes with a custom built hitch to suit your machine (Excavator, Backhoes and Skid Steer), avoiding any unnecessary wear on the pins or bushes. Skid steer loaders may incur a small additional cost for the hitch.

This Machine also comes with a built-in thumb saddle that when combined with the optional hydraulic thumb grab, can easily pick up and remove obstacles such as timber and rocks. The thumb saddle can also be used to drag material out of the way without damaging the mulcher body if a thumb saddle is not fitted to the dipper arm.

The Mulchers are locally designed and manufactured in Brisbane, Australia to suit Australian conditions, this means that they are equipped to do the job you need with amazing durability.

| MODEL | 75-EZFF | 100-EZFF | 125EZFF |
|-----------------------------|---------------|---------------|---------------|
| <i>Working Width</i> | 750mm | 900mm | 1000m |
| <i>Weight</i> | 550g | 950kg | 1100kg |
| <i>No of Flails</i> | 20 | 26 | 32 |
| <i>Thumb saddle</i> | Yes | Yes | Yes |
| <i>Excavator Size</i> | 8-12t | 12-20 t | 20t+ |
| <i>Material</i> | 150mm | 200 mm | 250 mm |
| <i>Hydraulic Flow Range</i> | 95LPM + | 120 LPM + | 180 LPM + |
